Experienced PHP/Laravel Developer with 7 years of expertise in web app and API development using Laravel. Skilled in following SOLID principles and practicing Test-Driven Development (TDD) using PHPUnit and PEST. Proficient in designing databases with MySQL/PostgreSQL while adhering to normalization rules. Additional experience includes CI/CD, GraphQL, Livewire, and Vue.js. Committed to delivering high-quality projects with clean and scalable code. Committed to continually improving and expanding skillset. Fluent in Turkish (native) and proficient in English at a professional level.

## EXPERIENCES

07/2016 – 11/2020, 07/2023 – ...

**FREELANCER, FOUNDER**, MEHMET NURULLAH SAĞLAM

I have founded my own company. Built a few corporate websites, and SaaS and am currently working with an agency called DigitalCake for numerous customers. Responsible for planning and delivering new features and existing issues.

09/2022 – 07/2023

**FULL-STACK DEVELOPER**, BEAST BURST ENTERTAINMENT

I am responsible for staging and applying the tasks, maintaining web applications and microservices. Used Laravel Livewire for front-end, Laravel for back-end, and MySQL as database.

03/2022 – 09/2022

**TEAM LEADER & FULL-STACK DEVELOPER**, TIMESOFT

I was responsible for staging and applying the business plan of projects, assisting in hiring processes, and getting an active role in development. Part of a team that builds online education systems.

07/2021 – 03/2022

**BACK-END DEVELOPER**, CUZDAN PAYMENT SERVICES

As a back-end developer, I was responsible for designing and optimizing databases, being part of the security team, and building and maintaining the company's in-house projects and back-end of the main product.

11/2020 – 07/2021

**WEB DEVELOPER**, LONDONIST STUDENT ACCOMMODATIONS

I was responsible for designing and optimizing databases. Also building and maintaining in-house projects.

## EDUCATION

09/2020 - ...
